

# SNAP-IN ALUMINUM CAPACITORS

## SNA AND SNL SERIES

[Click Here to View the SNA Series Datasheet](#)

[Click Here to View the SNL Series Datasheet](#)

## BASIC OVERVIEW

This product is new to the KYOCERA AVX portfolio. KYOCERA AVX is adding the Snap-in Aluminum Capacitors to the existing V-Chip and Radial Aluminum capacitor portfolio.

## APPLICATIONS

- Consumer Electronics
- Industrial Power and Lighting
- Telecommunications
- Renewable Energy
- Filtering and Power Decoupling
- Switched Mode Power Supplies

## GENERAL CHARACTERISTICS

- Snap-in lead configurations designed for easy mounting
- Used in a variety of applications
- Available in many different case sizes

## KEY SPECIFICATIONS

- High CV values
- High ripple current capabilities
- High endurance
- Wide operation voltage

## TOP SELLING POINTS / CHARACTERISTICS

KYOCERA AVX is a passive component industry leader, offering a broad range of the aluminum capacitors backed by the well established KYOCERA AVX global support and high quality standards.

## FAQ'S

**Q: What are the KYOCERA AVX Snap-in series?**

A: Snap-in series: SNA and SNL.

**Q: What is the Lead Time for the KYOCERA AVX Snap-in series?**

A: 20-24 weeks.

**Q: What range offers the highest rated voltage?**

A: SNL (550V).

**Q: What range offers the highest endurance?**

A: SNA (5000h).
