Subject: Export Control Measures on Certain Medium and Heavy Rare Earth Products from China

On April 4, 2025, the Ministry of Commerce (MOFCOM) and the General Administration of Customs (GACC) of the People's Republic of China jointly issued Announcement No. 18 (2025), officially implementing export control measures on certain medium and heavy rare earth materials regardless of destination.

KYOCERA AVX Components Corporation products do in some cases contain these rare earth materials and our team is diligently working to ensure that we have sufficient reserves to meet your needs without interruption. We are proactively taking measures to secure long term inventory stock.

Alternative Sourcing Strategies and Strengthening Global Partnerships

To mitigate the impact of these export controls, we are actively diversifying our supplier base. We are in process of forming multiple non-Chinese supplier partnerships to reduce dependency on any single source. This strategic diversification is designed to enhance our supply chain resilience and ensure a steady flow of materials. These collaborations are crucial in strengthening our global relationships and ensuring a consistent supply of high-quality materials.

Commitment to Quality and Stability

Our commitment to product quality and supply chain stability remains unwavering. We are dedicated to maintaining the highest quality standards and ensuring that our supply chain is robust and resilient. You can trust that we will continue to deliver the exceptional products you expect from us.

Assurance and Future Communication

We assure you of our commitment to overcoming these challenges. We are dedicated to keeping you informed of any further developments and will provide updates as necessary. Your satisfaction and trust are of utmost importance to us, and we are confident in our ability to navigate these changes effectively.
